Summary

Detail-oriented Computer Science student skilled in Java, Data Structures & Algorithms, and MERN stack development, with hands-on experience building AI-driven applications. Passionate about solving real-world problems through technology and actively participating in hackathons. Quick learner with strong problem-solving skills, seeking an opportunity to contribute as a Software Development Engineer Intern.

Projects

PathPilot AI - career guidance web application

- PathPilot AI developed a career guidance web platform to help computer science students choose structured learning paths based on academic year and career goals.
- Created multiple career roadmaps (AI Engineer, Web Developer, Data Scientist, etc.) with step-by-step learning paths, tools, and project recommendations.
- Integrated curated resources including tutorials, blogs, and free courses to support efficient learning.
- Implemented a career comparison feature to help users evaluate different roles based on skills, difficulty, and industry demand.
- Structured the platform with multiple pages (Home, Roadmaps, Resources, Features) ensuring smooth navigation and improved user experience.

DebtSense — AI Code Health & Bug-Risk Predictor

- **Mines commit history with PyDriller .**
- **Engineers features like code churn, author count, and commit frequency.**
- **Trains a RandomForest classifier using a temporal train/test split**
- **Outputs a color-coded CLI report ranking the riskiest files**
